DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the bid manager" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3629

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,6,8,9,13,15,16 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by US PAT 5,471,408 to Takamoto et al. (Takamoto).

Takamoto discloses a system for managing a construction process (col 4, lines 45-49), that generates a database of tasks (col 4, lines 56-60), manages documents required for completion of the tasks (i.e. flow chart in fig 16), managing communications associated with the completion of the tasks (searched points as best seen in flow chart of fig 2), which steps would inherently be done by computer code and computer logic as it is done on a computer.

As to claims 2,9 and 16, Takamoto discloses a document manager that manages documents (the system manages the documents stored therein).

As to claims 6,13 and 20, Takamoto discloses a scheduling manager (work-scheduling apparatus (50,51) as best seen in fig 15).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-5,7,10-12,14,17,18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takamoto.

Takamoto discloses a system as discussed above, Takamoto does not, however, specifically mention a 'communications manager', a 'scheduling manager' or a 'bid manager'.

As to claims 3, 10 and 17, the document manager is capable of determining a due date associated with a task (col 4, lines 61-54), it would be obvious to one of ordinary skill in the art to have the document manager send an alert if the steps required are not being met in a timely manner so as to ensure that each step is completed by its required end-date.

As to claims 4,11 and 18, Takamoto does not specifically mention a, "communications manager". However, it would have been obvious to one of ordinary skill in the art to have a manager for communications for a job as this would ensure that the proper dissemination of communications.

Art Unit: 3629

As to claims 5,12 and 19, it would be inherent that a communications manager would receive communications relating to a job, such as requests for information on completion date.

Conclusion

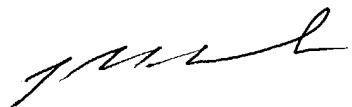

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US PAT 6,735,596 to Corynen, Corynen discloses a method of solving decision problems, such as sequential operations, based on the time required for each step (abstract), US PAT 5291394 to Chapman, Chapman discloses a method for virtually modeling a manufacturing process.
